

ARB GUIDELINES FOR CONCRETE PAVERS

All installations must adhere to the following specifications -

- * Concrete pavers 2 3/8" thickness
- * Only ONE color selection may be used throughout pattern
- * ICPI Guidelines incorporating a minimum aggregate base depth of 6" of crushed stone, an edge restraint, and joints filled with clean fine sand.
- * Border (same color as pavers) utilizing concrete pavers
- * ENTIRE driveway must be completed at time of application (no partial installation or borders only)
- * Original driveway dimensions cannot change
- * Adjacent walkway must be done in same pavers if some other application was done to original concrete walkway.
